AllClear Voice Quick start guide

Before You Start

You need to configure your account settings in the AllClear Voice Portal. Go to portal.alltechintegrations.com and click "Login". You can create your profile settings, setup your voicemail, call forwarding, upload phone lists and more.

The Basics

Soft Keys

The soft keys located underneath the phone screen perform the functions that appear directly above them on the display. Their functions are context sensitive, which means the function of the soft keys change depending upon your current activity. For example, if you are conferencing, the soft keys display functions related to the conference function.

Line Keys

With the VVX 300, you have the ability to access up to 6 lines. The line keys, located to the left and right of the phone screen, indicate the status of your lines and associated activity. The backlighting informs you when a line is idle, ringing, in use, on hold or disconnected altogether.

Navigation Keys

The Navigation keys allow you to scroll through the options and lists on the display keys by pressing left, right, up or down. To select an item, press the Select button (the button in the center of the navigation keys).

Answer a Call

To answer a call, simply pick up the handset or press the Answer soft key, Speakerphone key or Headset key.

Place a Call

To place a call, simply pick up the handset or press the New Call soft key, Speakerphone key or Headset key. Then dial the number.
